## **DETAILED ACTION**

### ***Status of the Claims***

1. The preliminary amendment received on June 6, 2005 amended claims 3, 6-10 and 12-19, canceled claims 22-23, and added new claims 24-30.

### ***Election/Restrictions***

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to a protein mixture.

Group II, claim(s) 10-13 and 24-26, drawn to a nucleic acid mixture.

Group III, claim(s) 14, drawn to a library of protein mixtures.

Group IV, claim(s) 15-19 and 29-30, drawn to methods of identifying a substance.

Group V, claim(s) 20-21, drawn to a kit.

Group VI, claim(s) 27-28, drawn to a library of vectors.

3. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical features are two fusion proteins and the nucleic acids encoding the fusion proteins.

Winter et al. (U.S. Patent 6291650 issued September 18, 2001) teach libraries of fusion proteins displayed on phage wherein the fusion proteins comprise a phage coat protein and scFv or a phage coat proteins and antigen.

4. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows (applicants are required to elect two species for each of a-c wherein one species is for the first fusion protein and the other species is for the second fusion protein):

- a. a single, specific species of protein or protein fragment (i.e. single, specific species for the first fusion protein and a single, specific species for the second fusion protein),
- b. a single, specific species of interaction domain (i.e. single, specific species for the first fusion protein and a single, specific species for the second fusion protein), and
- c. a single, specific species of translocation sequence (i.e. single, specific species for the first fusion protein and a single, specific species for the second fusion protein).

5. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. The claims are deemed to correspond to the species listed above in the following manner: for Group I: claims 2-8.
8. The following claim(s) are generic: for Group I, claim 1.
9. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species are structurally and/or functionally different.
10. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
11. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
